

Signs and instructions for your salon – how to print them?

1. Choose the set that best fits the interior design of your salon.

Remember that the colours displayed on the monitor may slightly differ from the printed copies.

2. Print all or just selected signs and instructions.

In order to achieve the best quality, we recommend using the services of a printing house. If you plan to place signs on slippery surfaces, for example, on the glass of the front door, consider having them printed on self-adhesive paper. An even better solution would be to use self-adhesive foil – thanks to this mysterious technology that uses the attraction of particles, you can repeatedly stick and unstick your signs and instructions onto various surfaces.

All files are prepared in the CMYK colour model.
File format: PDF.
